Capabilities

We deliver technology solutions that help clients to increase the effectiveness of the Security related initiatives. We have gained solid experience in various technologies that enables us to offer multiple options for customer and help select the right one.

Technologies

BURGLAR ALARM - Burglar (or intrusion) safety alarms are electronic alarms designed to alert the user to a specific danger. Active Total Security Systems is a Premiere Manufacturer of Burglar Alarm Systems in the Registered Brand Name of ATSS.

CCTV SURVEILLANCE - CCTV Camera Security Systems are quickly becoming an important aspect in Human Life.

CCTV ANALOG - Though most of our attention these days is focused on the transition to IP video technology, it's important to note that analog CCTV solutions can still be highly effective for many surveillance applications, especially those on a budget. With traditional CCTV, the video signal is processed and transmitted in analog format for local viewing from one central monitoring location. But that doesn't mean you can't use analog cameras in an IP-based surveillance environment.

Technologies

Using IP video encoders and other equipment such as digital video recorders and hybrid DVRs makes it possible to leverage your existing analog cameras while migrating into the world of digital surveillance.

CCTV IP - IP video technology provides flexible, scalable, and cost-effective surveillance solutions suitable for a wide range of industries and applications. With an IP-based video surveillance setup, users can monitor and record video remotely using an IP network as the system's backbone. IP video installations can be deployed in any environment, and offer many benefits previously unavailable with analog CCTV systems.

ACCESS CONTROL- Any system or method which automatically controls the passage of people and vehicles into or out of an area or structure

TIME ATTENDANCE - Time Attendance Management System is used by companies of all sizes to Maintain Staff Working Records.

Technologies

FIRE ALARM SYSTEMS - A Fire Alarm Security System is an active fire protection system that detects fire or the effects of fire, and as a result provides one or more of the following: notifies the occupants, notifies persons in the surrounding area, summons the fire service, and controls all the fire alarm components in a building. Fire alarm systems can include alarm initiating devices, alarm notification appliances, control units, fire safety control devices, annunciators, power supplies, and wiring.

AUTOMATION SYSTEMS - The technique of making an apparatus, a process, or a system operates automatically. Using Single Control Panel you can control Audio, Video, Home Theatre, lighting, Heating, cooling, surveillance camera, Video Door Phones, Intruder Alarm.

PA SYSTEMS - PA System is an electronic amplification system with a mixer, amplifier and loudspeakers, used to reinforce a given sound.

IP NETWORK - An IP address is an identifier for a computer or device on a TCP/IP network.

Technologies

VEHICLE TRACKING - A vehicle tracking system combines the installation of an electronic device in a vehicle, or fleet of vehicles.

VIDEO DOOR PHONE - Would you like to know who is at the door before you let them in? Using Video Door Phone lets you see who is knocking at your door before you open it.

SAFETY LOCKERS - Safety Locker Protect your valuables from burglary and fire. Ideal for stores, restaurants, small /medium sized businesses and homes.

GUARD TOUR SYSTEM - Guard Tour Reader records the time/date/location that the guard visited each area on the site. Incidents witnessed can also be entered on route.

FINGERPRINT DOOR LOCK - Finger is scanned and the fingerprint pattern is detected and used for access control through a keyless door lock.
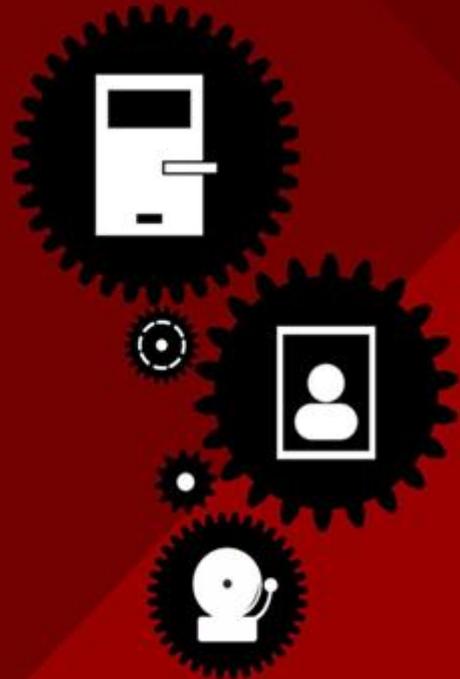

Technologies

HOTEL LOCK SYSTEMS - Hotel Lock System are new and improved way of being able to access a room or home without having to use a bulky key.

ID CARDS - A Plastic Card with a Person Name, often bearing a Photograph, that gives identifying data, such as Name, Age and Organizational Information.

SCHOOL TIMER - School Timer was designed to meet the needs for an easy programmable school bell timer, to activate electric gong bell or sirens on factory floors to alert shift changes or breaks, or any similar application where an external device needs to be triggered at a specific time on a daily or weekly schedule.

PAYROLL - In most large and medium organizations payroll is an essential monthly activity, which is fairly routine in nature. Depending on the size and nature of the organization, this activity can be fraught with complexities related to calculations, deductions and statutory regulations.

Technologies

There also exist several routine processes like leave management, income tax calculation and deductions, reimbursements.

CANTEEN MANAGEMENT - CMS design provides a user friendly system that facilitates quick and efficient operations to cover larger section of employees within a specified time. CMS is paperless and has almost cashless transactions. This system is also compatible in an environment where multiple Caterers operate in a closed environment or at multiple locations.

VISITOR MANAGEMENT - Visitor management refers to tracking the usage of a public building or site. By gathering increasing amounts of information, a visitor management system can record the usage of the facilities by specific visitors and provide documentation of visitor's whereabouts.
